

Brainstorming for Docspot Project

DATE	22JUN 2025
TEAM ID	LTVIP2025TMID30950
PROJECT NAME	DOCSPOT SEAMLESS APPOINTMENT BOOKING FOR HEALTH

Project Overview

Project Name: DOCSPOT SEAMLESS APPOINTMENT BOOKING FOR HEALTH

Objective: To create a seamless appointment booking system for healthcare services.

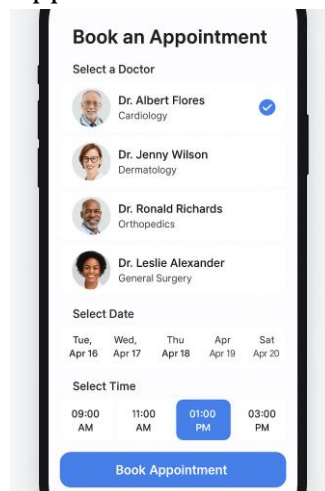

Key Features

User Registration and Login

- User authentication (email/password, social media logins)
- Profile management

Appointment Booking

- Search for healthcare providers
- View available time slots
- Book, reschedule, or cancel appointments

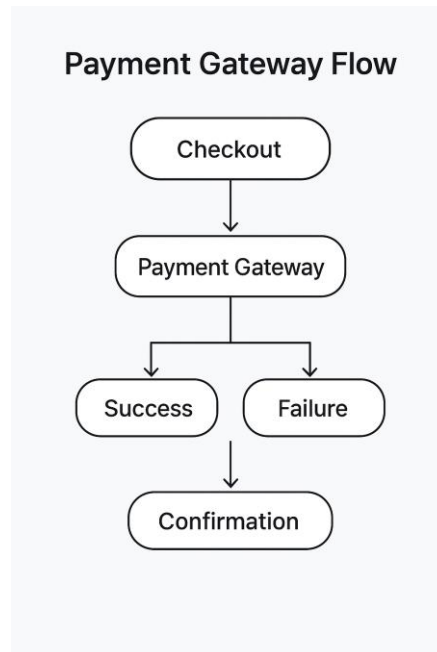

-

Notifications and Reminders

- - Email/SMS notifications for upcoming appointments
- - Reminders for follow-up appointments

Payment Integration

- - Secure payment processing
- - Support for multiple payment methods

-

Feedback and Reviews

- - Allow users to leave feedback on their experience
- - Display ratings and reviews for healthcare providers

Target Audience

- - Patients seeking healthcare services
- - Healthcare providers (doctors, clinics, hospitals)

Potential Challenges

- - Ensuring data privacy and security
- - Integrating with existing healthcare systems

- - User adoption and engagement

Ideas for Improvement

- - Implement a user-friendly interface
- - Offer a mobile app for on-the-go booking
- - Include telehealth options for virtual appointments

Next Steps

- - Research: Investigate existing appointment booking systems and identify gaps.
- - Design: Create wireframes and prototypes for the user interface.
- - Development: Set up the backend and frontend architecture.
- - Testing: Conduct user testing to gather feedback and make improvements.

DEVELOPMENT LIFE CYCLE:-
